

Reston, VA - October 24, 2022

CONCEPT SOLUTIONS WINS FAA SETIS IDIQ AWARD

The U.S. Department of Transportation's (DOT's) Federal Aviation Administration (FAA) awarded Concept Solutions, LLC (CS) the Systems Engineering and Technical Innovative Solutions (SETIS), which is a \$2.27 billion, ten-year, indefinite quantity/indefinite delivery (IDIQ), multiple award contract.

SETIS replaces the FAA's SE2020 and SE2025 contract portfolios. With 11 current awards across the large and small business tracks, CS is one of the few non-incumbent awardees. This vehicle will support the FAA in further transforming the National Airspace System (NAS) through the implementation of NextGen and related programs. CS will lead a team of small and large business partners to provide a broad range of research/service analysis and innovative systems engineering support services.

“Concept Solutions is humbled and honored that the FAA has entrusted our SETIS team to help further their vision and deliver sustained value across a broad range of capabilities, with both innovation and safety as key tenets. This is an exciting time for our evolving airspace system and the people, engineering, and technology driving it forward. Our team is ready to deliver on SETIS.”

Jason Cunha, CS Aerospace VP

As technology is being continuously developed in new ways, the capabilities that our team brings to the SETIS contract blends innovation and modern technology practices to deliver better solutions that are more safe, usable, and secure for the FAA. Our approach provides transparent leadership and guidance, innovation, and best practices with the primary goal of developing and delivering operational excellence.

About Concept Solutions, LLC

Founded in 1999, Concept Solutions, LLC, headquartered in Reston, Virginia, is a management, systems engineering, and information technology consulting company committed to providing strategic solutions enabling organizations to operate more efficiently.
